

# One Barangaroo, Sydney

by WilkinsonEyre

In 2013, WilkinsonEyre won an international design competition for the new Crown Hotel in Sydney; the brief calls for a high quality, landmark design on this extraordinary harbour site. This incredible project will capture the vibrancy of Sydney to create a strong new destination on the waterfront, for both tourists and Sydneysiders.

The concept takes its inspiration from nature, composed of an elegant, curved geometry. The tower's form emanates from three petals which twist and rise together. The first form peels off, spreading outward to form the main hotel accommodation, with the remaining two twisting together toward the sky; this sculptural shape maximises the opportunity for accommodation within the tower to enjoy views of the famous bridge and harbour.

The six-star hotel and casino features a number of high-end leisure facilities. Above this sits hotel rooms and suites, with high-end residential properties at the top of the tower.

At the lower levels, the podium responds to the adjacent public space with terraces and entrances at ground level that make strong connections, particularly to the waterfront, with cafés, bars, shops and restaurants to encourage activity. The project is currently under

## Details

Location: Sydney, Australia  
Client: Crown Resorts Limited  
Architect: WilkinsonEyre  
Local Architect Partner: Bates Smart Sydney  
Services Engineer: Aecom  
Structural Engineer: Robert Bird Group  
Area: 146,500m<sup>2</sup>  
Height: 71 storeys / 275m  
Date: Completion due January 2021  
Planning achieved: June 2016  
Green Star: 6 (Target)
